

Equipment Maintenance Log

Clinical Device Certification & Maintenance Tracking System

Product: Ambulatory Surgery Center Compliance Manual — Tier 1

Version: 1.0

Applicable Standards: CMS §416.44 (Environment), §416.42 (Surgical Services), AAAHC Facility & Equipment Standards, NFPA 99, AAMI Standards

How to Use This Document

This log provides standardized templates for tracking every clinical device in your ASC. CMS requires that all equipment is maintained per manufacturer recommendations and that maintenance records are readily available during survey.

Instructions

1. **Complete the Master Equipment Inventory** (Section 1) for every device in your facility
2. **Use the Maintenance Event Log** (Section 2) each time maintenance is performed
3. **Track certifications** in the Certification Tracking section (Section 3)
4. **Review the Vendor Directory** (Section 4) to ensure contacts are current
5. **Conduct monthly reviews** using the Monthly Compliance Check (Section 5)

Small Team Tip: Designate one person as “equipment coordinator.” Even if they also do clinical work, having a single point of accountability prevents items from falling through the cracks. Schedule 30 minutes on the first Monday of each month for equipment review.

Section 1: Master Equipment Inventory

How to Complete

- Assign each device a unique **Asset ID** (e.g., OR1-ANES-001 = OR Room 1, Anesthesia, Unit 001)
 - Enter ALL clinical devices, including crash cart contents, sterilization equipment, and monitoring devices
 - Update this inventory whenever equipment is added, removed, or relocated
-

Operating Room Equipment

Asset ID	Device Name	Manufacturer	Model Number	Serial Number	Location	Date Acquired	Expected Lifespan	Replacement Plan Date	Status
OR1-ANES-001					OR 1				☐ Active ☐ Retired
OR1-ANES-002					OR 1				☐ Active ☐ Retired
OR1-MON-IT-001					OR 1				☐ Active ☐ Retired
OR1-SURG-001					OR 1				☐ Active ☐ Retired
OR1-LIGHT-001					OR 1				☐ Active ☐ Retired
OR1-TABLE-001					OR 1				☐ Active ☐ Retired
OR1-ESU-001					OR 1				☐ Active ☐ Retired
OR2-ANES-001					OR 2				☐ Active ☐ Retired
OR2-ANES-002					OR 2				☐ Active ☐ Retired
OR2-MON-IT-001					OR 2				☐ Active ☐ Retired
					OR 2				

Asset ID	Device Name	Manufacturer	Model Number	Serial Number	Location	Date Acquired	Expected Lifespan	Replacement Plan Date	Status
OR2-SURG-001									☐ Active ☐ Retired
OR2-LIGHT-001					OR 2				☐ Active ☐ Retired
OR2-TABLE-001					OR 2				☐ Active ☐ Retired
OR2-ESU-001					OR 2				☐ Active ☐ Retired

Sterilization Equipment

Asset ID	Device Name	Manufacturer	Model Number	Serial Number	Location	Date Acquired	Expected Lifespan	Replacement Plan Date	Status
STER-AUTO-001	Autoclave / Steam Sterilizer				Sterile Processing				☐ Active ☐ Retired
STER-AUTO-002					Sterile Processing				☐ Active ☐ Retired
STER-WASH-001	Instrument Washer				Sterile Processing				☐ Active ☐ Retired
STER-DRY-001	Drying Cabinet				Sterile Processing				☐ Active ☐ Retired
STER-SEAL-001	Pouch Sealer				Sterile Processing				☐ Active ☐ Retired

Recovery / PACU Equipment

Asset ID	Device Name	Manufacturer	Model Number	Serial Number	Location	Date Acquired	Expected Lifespan	Replacement Plan Date	Status
PACU-MON-IT-001	Patient Monitor				PACU Bay 1				☐ Active ☐ Retired
PACU-MON-IT-002	Patient Monitor				PACU Bay 2				☐ Active ☐ Retired
PACU-PUMP-001	IV Pump				PACU				☐ Active ☐ Retired
PACU-PUMP-002	IV Pump				PACU				☐ Active ☐ Retired
PACU-SUCT-001	Suction Unit				PACU				☐ Active ☐ Retired
PACU-O2-001	Oxygen Delivery System				PACU				☐ Active ☐ Retired

Emergency Equipment

Asset ID	Device Name	Manufacturer	Model Number	Serial Number	Location	Date Acquired	Expected Lifespan	Replacement Plan Date	Status
EMRG-CART-001	Crash Cart				Main Hallway				☐ Active ☐ Retired
EMRG-DE-FIB-001	Defibrillator / AED				Crash Cart				☐ Active ☐ Retired
EMRG-VENT-001	Emergency Ventilator / Ambu Bag				Crash Cart				☐ Active ☐ Retired
EMRG-SUCT-001	Portable Suction				Crash Cart				☐ Active ☐ Retired
EMRG-MH-001	Malignant Hyperthermia Cart				OR Corridor				☐ Active ☐ Retired

Facility / Environmental Equipment

Asset ID	Device Name	Manufacturer	Model Number	Serial Number	Location	Date Acquired	Expected Lifespan	Replacement Plan Date	Status
FAC-HVAC-001	HVAC System				Mechanical Room				☐ Active ☐ Retired
FAC-GAS-001	Medical Gas System (O2)				Mechanical Room				☐ Active ☐ Retired
FAC-GAS-002	Medical Gas System (N2O)				Mechanical Room				☐ Active ☐ Retired
FAC-VAC-001	Medical Vacuum System				Mechanical Room				☐ Active ☐ Retired
FAC-GEN-001	Emergency Generator				Exterior				☐ Active ☐ Retired
FAC-UPS-001	UPS / Battery Backup				Server Room				☐ Active ☐ Retired

Additional Equipment (Add rows as needed)

Asset ID	Device Name	Manufacturer	Model Number	Serial Number	Location	Date Acquired	Expected Lifespan	Replacement Plan Date	Status
									☐ Active ☐ Retired
									☐ Active ☐ Retired
									☐ Active ☐ Retired
									☐ Active ☐ Retired
									☐ Active ☐ Retired

Section 2: Maintenance Event Log

Instructions

- Record EVERY maintenance event — preventive, corrective, and emergency repairs
- Attach or reference work orders, service reports, and invoices
- Keep completed logs for a minimum of 3 years (some states require longer)

Preventive Maintenance (PM) Log

Date	Asset ID	Device Name	PM Type	Performed By	Company / In-House	Work Order #	Findings / Actions Taken	Parts Replaced	Next PM Due	Compliance Notes
			☐ Annual ☐ Semi-Annual ☐ Quarterly ☐ Monthly							
			☐ Annual ☐ Semi-Annual ☐ Quarterly ☐ Monthly							
			☐ Annual ☐ Semi-Annual ☐ Quarterly ☐ Monthly							
			☐ Annual ☐ Semi-Annual ☐ Quarterly ☐ Monthly

Section 5: Monthly Compliance Review Checklist

Complete this checklist on the **first business day of each month**.

Monthly Review — Month: _ Year: _

#	Review Item	Status	Notes / Action Required
1	All PM services completed per schedule this month	☐ Yes ☐ No ☐ N/A	
2	No equipment operating with overdue maintenance	☐ Yes ☐ No	
3	All certification/calibration records current	☐ Yes ☐ No	
4	All sterilizer BI tests documented with results	☐ Yes ☐ No	
5	No outstanding equipment recalls unaddressed	☐ Yes ☐ No	
6	Temperature logs current for all required equipment	☐ Yes ☐ No	
7	Crash cart checked and sealed (daily log current)	☐ Yes ☐ No	
8	Defibrillator tested per manufacturer schedule	☐ Yes ☐ No	
9	Emergency generator tested (weekly/monthly per code)	☐ Yes ☐ No	
10	All vendor service contracts current (not expired)	☐ Yes ☐ No	
11	FDA safety alerts reviewed (check FDA MedWatch)	☐ Yes ☐ No	
12	Equipment inventory updated (any additions/removals)	☐ Yes ☐ No	

#	Review Item	Status	Notes / Action Required
13	Manufacturer IFU (Instructions for Use) on file for all devices	☐ Yes ☐ No	
14	Any equipment-related incident reports filed and reviewed	☐ Yes ☐ No ☐ N/A	

Reviewed By: ____ Date: ____

Issues Requiring Follow-Up:

Issue	Priority	Assigned To	Due Date	Resolved Date
	☐ Critical ☐ High ☐ Medium ☐ Low			
	☐ Critical ☐ High ☐ Medium ☐ Low			
	☐ Critical ☐ High ☐ Medium ☐ Low			

Section 6: Equipment-Specific Maintenance Schedules

Common ASC Equipment — Recommended Maintenance Frequency

This reference table lists typical maintenance intervals. **Always defer to the manufacturer's Instructions for Use (IFU)** — CMS requires maintenance per manufacturer specifications.

Equipment Category	Device Type	Typical PM Frequency	Calibration Frequency	Common Maintenance Tasks
Anesthesia	Anesthesia Machine	Semi-annual + daily checks	Annual	Vaporizer calibration, circuit checks, leak testing, O2 sensor replacement
Anesthesia	Ventilator	Semi-annual	Annual	Flow sensor calibration, bellows inspection, alarm testing
Monitoring	Patient Monitor	Annual	Annual (per parameter)	SpO2 accuracy, NIBP calibration, ECG lead check, alarm testing
Monitoring	Capnography	Semi-annual	Annual	Sensor calibration, water trap, tubing integrity
Surgical	Electrosurgical Unit (ESU)	Annual	Annual	Power output calibration, ground fault testing, pad alarm testing
Surgical	Surgical Lights	Annual	N/A	Bulb replacement, intensity check, positioning mechanism, battery backup
Surgical	OR Table	Semi-annual	N/A	Hydraulic system, electrical safety, pad inspection, position lock testing
Sterilization	Steam Autoclave	Quarterly PM + daily/weekly BI	Annual calibration	Gasket replacement, drain cleaning, chamber inspection, BI testing

Equipment Category	Device Type	Typical PM Frequency	Calibration Frequency	Common Maintenance Tasks
Sterilization	Ultrasonic Cleaner	Monthly	Semi-annual	Cavitation testing, temperature verification, drain cleaning
Emergency	Defibrillator/AED	Monthly self-test + annual PM	Annual	Battery check, pad expiration, capacitor test, ECG accuracy
Emergency	Crash Cart	Daily check when OR active	N/A	Medication expiration, supply inventory, equipment function
Facility	Emergency Generator	Weekly (unloaded) + annual (loaded)	Annual transfer switch test	Oil, coolant, battery, load bank testing, ATS testing
Facility	Medical Gas System	Annual	Annual	Pressure testing, alarm verification, zone valve testing
Facility	HVAC / Air Handling	Quarterly filter + annual full PM	Annual air exchange verification	Filter replacement, air exchange rate, pressure relationships
Pharmacy	Medication Refrigerator	Daily temp log + annual PM	Annual thermometer calibration	Temperature accuracy, alarm testing, door seal, defrost

Section 7: Compliance Quick-Reference

What Surveyors Look For — Equipment

1. **Maintenance records match manufacturer IFU** — If the manufacturer says annual PM, you must have annual PM documented

2. **No equipment in use past maintenance due date** — If PM is overdue, the device should be taken out of service until serviced
3. **Biological indicator logs for sterilizers** — Weekly minimum, with action documented for any failures
4. **Crash cart sealed and checked daily** — Break-away seal intact, daily check log signed
5. **Temperature logs** — Medication refrigerator, blanket warmer, autoclaves — daily when in use
6. **Emergency generator** — Weekly test log, annual load test, automatic transfer switch test
7. **Medical gas inspection** — Annual third-party inspection report on file
8. **Electrical safety** — Biomedical engineering inspection stickers current on all clinical devices
9. **Manufacturer IFU on file** — For every reprocessed instrument and device
10. **Equipment removed from service is clearly labeled** — “OUT OF SERVICE — DO NOT USE” tags

Common Deficiencies to Avoid

Deficiency	How to Prevent
Overdue PM on clinical devices	Set calendar alerts 30 days before PM due dates
Missing sterilizer BI documentation	Use standardized log; review weekly
Expired defibrillator pads	Add pad expiration to monthly check; stock spares
Medication refrigerator temperature gaps	Use continuous monitoring with alarm; backup thermometer
No manufacturer IFU on file	Request from manufacturer for every device; file centrally
Generator test log gaps	Assign specific staff member; set recurring calendar event
Crash cart seal broken without documentation	Policy: every seal break = documented check + reseal
Equipment in use without current calibration sticker	Biomedical engineering check stickers visible on each device

Document Version Control

Version	Date	Author	Changes
1.0	Initial Release	ASC Compliance Team	Original equipment maintenance system

This document is part of the ASC Compliance Manual — Tier 1: Essential Compliance Package (\$97). For the complete system including staff training matrices, policy templates, and quarterly update frameworks, upgrade to Tier 2: Complete Certification System (\$197).
